

# TOP 20 MEP CONSULTANTS

## P&T ARCHITECTS & ENGINEERS

**P**&T Architects & Engineers picked up the Mechanical Project of the Year at the 2015 MEP Awards Middle East for its work on the Burj Rafal in Saudi Arabia. The firm was praised by judges for its forward-planning on the Riyadh-based mixed-use project which includes a Kempinski Hotel and 440 residential apartments.

The firm is close to completing residential and office towers as part of the City of Lights scheme in Abu Dhabi. It has been undertaking architectural, structural and MEP pre and post contract work for clients Tamouh Investments and China State Construction Engineering Corporation.

Aqaba hotels and villas, Jordan; Hameni Tower, Jumeirah Village Circle, Dubai; Krystal Tower, Dubai; and Empower headquarters, also in Dubai.

MEP director Rehan Shahid cites low oil prices and retaining experienced staff as key challenges this year. He predicts “conservative” revenue growth of 10% for the firm.

“There is a concerted effort and funds available to employ new skills and software in line with the demand of the clients and the industry,” Shahid says.

“We have in-house training programmes on regular basis to keep the team up to date with the developments in our industry; also regular training is offered for the users of Revit, AutoCAD, BIM and various engineering software being used by the firm whenever new versions are introduced.”
